SUMMARY

Engineering professional with 25+ years of evolution from Mechanical Engineering to Full-Stack Development and Leadership. Currently specializing in AI hyper-automation and crypto-infrastructure. Proven track record in legacy refactoring, AWS cloud migration, Docker, CI/CD, and leading distributed agile teams.

EXPERIENCE (SELECTED)

Founder & Freelance Developer Mar 2026 - Present
Vibratec — Andorra (AD)
Independent technical practice — available for both freelance contracts and part-time/contract employment. Service focus: senior full-stack development, legacy modernization, and AI-automation.

Full Stack Developer - Team Coordinator Jan 2019 - Mar 2026
InThinking SL — Ordino (AD)
Led a team of 9 developers through a major digital transformation, migrating legacy PHP systems to Symfony/AWS. Implemented Scrum methodologies and CI/CD pipelines to modernize delivery.

Computer Science Teacher - SysAdmin - Fullstack Dev Mar 2008 - Jan 2019
COL·LEGI DELS PIRINEUS S.A — L'Aldosa de La Massana (AD)
Designed and delivered a comprehensive K-12 CS curriculum while managing the school's hybrid Windows/Linux server infrastructure and internal gradebook tools.

System Engineer Jul 1999 - Feb 2001
Microsoft France — Paris (FR)
Selected for the elite 3-month EMEA Technical Residency. Provided premier engineering support and account management for enterprise clients like Fnac and HP.

EDUCATION

Master of Science in Engineering · ENIT 1998

CORE STACK

Symfony 6, 7 and 8 · PHP 7 and 8 · AWS EC2, RDS and SES · Docker · GitHub CI/CD · n8n · AI Agents · Rust · MySQL & MariaDB · Linux · MacOS · Windows
